

### **Amendments to the Specification**

Please delete original paragraph [0018] and substitute the following replacement paragraph.

[0018] Referring to Fig. 1, an exemplary user computer system UCS 100 includes processor 101 and memory 102. Memory 102 represents all UCS 100 components and subsystems that provide data storage, such as RAM, ROM, and hard drives. In addition to providing permanent storage for all programs installed on UCS 100, memory 102 also provides temporary storage required by the operating system and the applications while they are executing. In a preferred embodiment, UCS 100 is a typically equipped personal computer, but UCS 100 could also be a portable computer, a tablet computer or other device. The user views images from UCS 100 on display 140, such as a CRT or LCD screen, and provides inputs to UCS 100 via input devices ~~150~~ 130, such as a keyboard and a mouse.

Please delete original paragraph [0035] and substitute the following replacement paragraph.

[0035] In the third tool, “Create custom color scheme for selected image” 318 is an informational notice informing the user of the purpose of buttons “Change first component color” 320 and “Change second component color” 322. Buttons ~~330~~ 320 and 322 and color blocks 328 and 330 will not be active unless an image area having appropriate grayscale content has been selected by the user. When an image area of template 300 containing grayscale pattern content is selected, color block 328 displays the current color associated with a first color component of the pattern in the selected image area in template 300 and color block 330 displays the current color associated with a second component color of the selected image.
